Total is summary of all tests/labs - not just the high volume labs

Turn around time is the difference in reported date of collection and date reported to public health. Note that this includes time specimens are held at a collecting location and transit time to the lab. Therefore it is not solely a marker of capacity and response at a lab.

Notes: Data in these charts show:

Confirmed cases by positive test result and result date on the daily basis since March 21, 2020;

Deaths by the last activity date with a last status of close-deceased from COVID-19;

Total daily beds as sums of daily ICU and acute beds for Union Hospital-Cecil County only; self-reported hospital data to MIEMSS reflect point in time counts;

Zip codes with ≤ 7 cases will be suppressed according to MDH.
